

# Memorandum

**Date:** August 13, 2014

**To:** Jack Osterholt, Deputy Mayor/Director  
Department of Regulatory and Economic Resources

**From:** Jose Gonzalez, P.E.  
Department of Regulatory and Economic Resources

A handwritten signature in black ink, appearing to read "Jose Gonzalez". The signature is written in a cursive, flowing style.

**Subject:** C-12 #Z2014000086  
Richard Del Cueto and Liliana Del Cueto  
9490 SW 99<sup>th</sup> Street, Miami, FL 33176  
Non-Use Variance to permit a pool and guest house setback less  
than required and in front of the principal building  
(EU-1) (.97 Acres)  
04-55-40

---

The subject application has been reviewed by the Department of Regulatory and Economic Resources – Division of Environmental Resources Management (DERM) for compliance with the requirements of Chapter 24 of the Miami-Dade County Code (the Code) and meets the minimum requirements of the Code. Accordingly, the application may be scheduled for public hearing.

#### Potable Water Service and Wastewater Disposal

Public water and public sanitary sewers can be made available to the subject property. Therefore, connection of the proposed development to the public water supply system and sanitary sewer system shall be required, in accordance with Code requirements. All sewer lines serving the property shall comply with the exfiltration standards as applied to development within wellfield protection areas.

Existing public water and public sanitary sewer facilities and services meet the Level of Service (LOS) standards set forth in the Comprehensive Development Master Plan (CDMP). Furthermore, the proposed development order, if approved, will not result in a reduction of the LOS standards subject to compliance with the conditions required by DERM for this proposed development order.

Notwithstanding the foregoing, and in light of the fact that the County's sanitary sewer system has limited sewer collection, transmission, and treatment capacity, no new sewer service connections can be permitted, unless there is adequate capacity to handle the additional flows that this project would generate. Consequently, final development orders for this site may not be granted if adequate capacity in the system is not available at the point in time when the project will be contributing sewage to the system. Lack of adequate capacity in the system may require the approval of alternate means of sewage disposal. Use of an alternate means of sewage disposal may only be granted in accordance with Code requirements, and shall be an interim measure, with connection to the public sanitary sewer system required upon availability of adequate collection/transmission and treatment capacity.

#### Stormwater Management

Stormwater should be retained on site utilizing designed seepage or infiltration drainage system. Drainage plans shall provide for full on-site retention of the stormwater runoff generated by a 5-year/1-day storm event.

Site grading and development plans shall comply with the requirements of Chapter 11C of the Code, as well as with all state and federal criteria, and shall not cause flooding of adjacent properties.

Any proposed development shall comply with county and federal flood criteria requirements. The proposed development order, if approved, will not result in a reduction in the LOS standards for flood protection set forth in the CDMP subject to compliance with the conditions required for this proposed development order.

#### Tree Preservation

The subject property contains a specimen-sized (trunk diameter 18 inches or greater) live oak tree, which is depicted on the submitted survey and site plans as tree #10. Section 24-49.2(II) of the Code requires that specimen-sized trees be preserved whenever reasonably possible. Please be advised that this specimen-sized live oak tree is shown to be preserved, however non specimen trees will be removed as per the site plans; therefore, a Miami-Dade County Tree Removal/Relocation Permit is required prior to the removal and/or relocation of any tree that is subject to the Tree Preservation and Protection provisions of the Code. Said Tree Removal Permit shall meet the requirements of Sections 24-49.2 and 24-49.4 of the Code.

The applicant is required to comply with the above tree permitting requirements. DERM's approval of the subject application is contingent upon inclusion of said tree permitting requirements in the resolution approving this application. The applicant is advised to contact Tree Permitting Program at 305-372-6574 for additional information regarding tree permitting procedures and requirements prior to site development.

#### Enforcement History

There are no open or closed enforcement records for violations of Chapter 24 of the Code for the subject property.

#### Concurrency Review Summary

A concurrency review has been conducted for this application and has determined that the same meets all applicable LOS standards for an initial development order, as specified in the adopted CDMP for potable water supply, wastewater disposal, and flood protection. Therefore, the application has been approved for concurrency subject to the comments and conditions contained herein.

This concurrency approval does not constitute a final concurrency statement and is valid only for this initial development order, as provided for in the adopted methodology for concurrency review. Additionally, this approval does not constitute any assurance that the LOS standards would be met by any subsequent development order applications concerning the subject property.

This memorandum shall constitute written approval as required by Chapter 24 of the Code.

If you have any questions concerning the comments or wish to discuss this matter further, please contact Christine Velazquez at (305) 372-6764.
