

Memorandum

Date: July 21, 2015

To: Jack Osterholt, Deputy Mayor/Director
Department of Regulatory and Economic Resources

From: Jose Gonzalez, P.E.
Department of Regulatory and Economic Resources

A handwritten signature in black ink, appearing to read "Jose Gonzalez". The signature is written in a cursive, flowing style.

Subject: C-12 #Z2015000045-2nd Revision
W R C Properties, LLC., a Delaware limited liability company
8525 Mills Drive, Miami, FL 33183
Special Exception to permit the expansion of a bar.
(BU-2) (27.49 Acres)
36-54-39

The subject application has been reviewed by the Department of Regulatory and Economic Resources – Division of Environmental Resources Management (DERM) for compliance with the requirements of Chapter 24 of the Miami-Dade County Code (the Code) and meets the minimum requirements of the Code. Accordingly, the application may be scheduled for public hearing.

Wellfield Protection

The subject property is located within the Basic Wellfield Protection Area for the Alexander Orr/Snapper Creek/Southwest Wellfield Complex. Development of the subject property shall be in accordance with the regulations established in Section 24-43 of the Code. Since the subject request is for a non-residential land use, the owner of the property has submitted a properly executed covenant in accordance with Section 24-43(5) of the Code which provides that hazardous materials or wastes shall not be used, generated, handled, discharged, disposed of or stored on the subject property.

Potable Water Service and Wastewater Disposal

Public water and public sanitary sewers can be made available to the subject property. Therefore, connection of the proposed development to the public water supply system and sanitary sewer system shall be required, in accordance with Code requirements. All sewer lines serving the property shall comply with the exfiltration standards as applied to development within wellfield protection areas.

Existing public water and public sanitary sewer facilities and services meet the Level of Service (LOS) standards set forth in the Comprehensive Development Master Plan (CDMP). Furthermore, the proposed development order, if approved, will not result in a reduction of the LOS standards subject to compliance with the conditions required by DERM for this proposed development order.

Notwithstanding the foregoing, and in light of the fact that the County's sanitary sewer system has limited sewer collection, transmission, and treatment capacity, no new sewer service connections can be permitted, unless there is adequate capacity to handle the additional flows that this project would generate. Consequently, final development orders for this site may not be granted if adequate capacity in the system is not available at the point in time when the project will be contributing sewage to the system. Lack of adequate capacity in the system may require the approval of alternate means of sewage disposal. Use of an alternate means of sewage disposal may only be granted in accordance

with Code requirements, and shall be an interim measure, with connection to the public sanitary sewer system required upon availability of adequate collection/transmission and treatment capacity.

Air Quality Preservation

In the event of any kind of renovation or demolition activity, an asbestos survey from a Florida-licensed asbestos consultant is required. If said survey shows friable asbestos materials in amounts larger than prescribed by federal law (260 linear feet of pipe insulation/thermal system insulation [TSI] or 160 square feet of surfacing material), then those materials must be removed/abated by a Florida-licensed asbestos abatement contractor. A notice of asbestos renovation or demolition form must be filed with the Air Quality Management Division of DERM for both the abatement (renovation) work and the demolition activity at least 10 working days prior to starting the field operations.

Concurrency Review Summary

A concurrency review has been conducted for this application and has determined that the same meets all applicable LOS standards for an initial development order, as specified in the adopted CDMP for potable water supply, wastewater disposal, and flood protection. Therefore, the application has been approved for concurrency subject to the comments and conditions contained herein.

This concurrency approval does not constitute a final concurrency statement and is valid only for this initial development order, as provided for in the adopted methodology for concurrency review. Additionally, this approval does not constitute any assurance that the LOS standards would be met by any subsequent development order applications concerning the subject property.

This memorandum shall constitute written approval as required by Chapter 24 of the Code.

If you have any questions concerning the comments or wish to discuss this matter further, please contact Christine Velazquez at (305) 372-6764.
